M: Course Objectives / Learning Outcomes

Upon successful completion of this course, the student will be able to:

- 1. Describe etiological factors and characteristics of individuals with exceptionalities, including prevalence and incidence.**
- 2. Define intellectual disability using DSM IV and other methods.**
- 3. Explore the various identification and assessment procedures including diagnosis.**
- 4. Critically examine the issues and trends in the definition and identification of individuals with exceptionalities.**

N: Course Content: The following global ideas guide the design and delivery of this course:

Individuals with disabilities are unique, though they may carry a label of disability.
Effective practitioners have an awareness of programs and services that exist in the community.
A person is not their disability.
Individuals share both similarities and differences in cognitive, cultural, social and emotional needs.

O: Methods of Instruction
