N: Course Content

Global ideas that guide the design and delivery of the course:

1. The early childhood educator works cooperatively with others (both children and adults) as listener, communicator, supporter, facilitator, guide and problem-solver. The development of effective skills for relating intrapersonally and interpersonally is essential to becoming a reflective practitioner.
2. By observing and assessing children on a regular basis, the early childhood educator is able to plan a program that is age-appropriate, culturally sensitive, and able to meet the individual needs and interests of each child in inclusive early childhood programs. Regular observation and documentation also provide information about each child's development; information which is shared with the family.
3. The early childhood educator guides children's learning throughout the day using methods which are intended to promote a strong sense of self-esteem within each child and ultimately lead to autonomy for each child.
4. Early childhood educators engage in regular evaluations (including self-assessment) to gain insight into their progress, skills and abilities as professionals. They set goals, identify and participate in relevant professional development activities.
