IV. Human Impact on the Physical World**1. Human impact on vegetation**

- a) **fire**
- b) **deforestation**
- c) **desertification**

2. Human influence on animal life

- a) **domestication**
- b) **dispersals**
- c) **extinctions and expansions**

3. Human impact on the soil

- a) **fertilizers**
- b) **salinity**
- c) **laterization**
- d) **erosion**

4. Human impact on water

- a) **dry deforestation**
- b) **ground water**
- c) **pollution**

5. Human impact on the atmosphere

- a) **carbon dioxide levels**
- b) **ozone change**
- c) **pollutants**
- d) **acid deposition**

V. Conclusion

1. Environmental attitudes and action
2. Environmental legislation in Canada
3. Prospects

Q. METHOD OF INSTRUCTION

The presentation of information will be by means of lectures, discussion groups, films and slides. Field trips and field work will take place in class time. Some map and lab work will also be included.

R. COURSE EVALUATION

The evaluation will be carried out in accordance with Douglas
